MAPLE BAY SHOW.

Annual Show of the Cowichan Agricultural Society.

List of Prizes Awarded—A Very Successful Show.

The annual exhibition of the Cowichan, Salt Spring and Chemainus Agricultural Society was held at Maple Bay on Saturday. The attendance was large and the show was a most gratifying success. The steamers Rainbow from Victoria and Amelia from Nanaimo, conveyed several hundred passengers to the exhibition, arriving at the grounds about noon.

The number of entries were said to be somewhat smaller than last year, but in variety and excellence the exhibits were fully equal to those of any former show, while in several departments they were superior. In live stock, the principal exhibitors were Mr. Jackson, of Wellington, whose Percheron stallion was greatly admired, and Mr. Botterell in sheep. There was a very fine display of saddle horses, and Mr. Sam Gray showed squashes about as large in diameter as the owner is longitudinally. The officers of the society—J. Evans, president; H. Bonsall, treasurer, and P. Fleet, secretary—were indefatigable in their efforts to make the exhibition a success. The following is the prize list:

A foot race of sixty yards was run in the afternoon between C. H. Casper of Saanich, and Angus Bell of Cowhican, for $10. The race was won by Bell by about one yard. The judges were D. F. Tolmie, of Victoria; C. A. Valisky and Alex. Wain, of Saanich.

The only drawback to the day's amusement was the unfortunate accident that occurred to Mrs. H. O. Wilbur. She was kicked by a bolt while looking at the stock exhibit, and quite seriously injured. She was immediately removed to her home by friends.

A Chinese transport has been wrecked on one of the Pescadores islands and 3000 soldiers and the captain and crew with the exception of one man were drowned.

Port Hamilton has been ceded back by England, through the representations of China, to the Kingdom of Corea.

INLAND INFORMATION.

Row on a Train—Chinaman Killed—the Crops—Personals, &c.

[From the Inland Sentinel.]

The price of town lots in Kamloops has advanced lately.

The recent rains have caused the grass on the hills to grow with unusual vigor, to the entire satisfaction of men and cattle.

A freight train on the C. P. R. jumped the track, three miles west of Spence's bridge on Thursday morning. Six cars left the track but very little damage was done. No person was seriously injured.

Geo. Parker, brakeman on one of the C. P. R. freight trains, on Friday was arraigned before G. W. Jones, J. P., charged with assaulting Conductor H. Atherton, and was discharged, there not being sufficient evidence to convict him. Atherton and Parks have not been on good terms of late. On Sunday Parks refused to obey the conductor's orders at Savona, and Atherton used abusive language towards him and slapped his face. Near Ashcroft another altercation occurred, when Atherton went to strike Parks with his lantern. Parks who had a break stick in his hand struck Atherton over the eye, knocking him senseless.

Yicks Shing, a Chinaman, employed in one of the C. P. R. section gangs near Shuswap, on Saturday evening last fell off the train on which he was working and was run over. He had been sitting on a break wheel, and it is supposed that he slipped off and fell between the cars. He was not missed for a time, and was picked up on the return of the train after it had taken on a load of gravel. A number of his companions brought him to town and left him in a tent near the station all night. In the morning the poor fellow was found dead, he having perished from loss of blood. One of his legs was broken while he was otherwise injured.

The want of an assay office in Kamloops has been one of considerable duration and has become almost a necessity. It would be a judicious and proper step, we think, for the government to appoint a competent assayer and establish a well equipped office here.

Harvest operations are now pretty well over in Okanagan and threshing is going forward; the yield has been quite liberal, and even where no irrigation was had the return exceeded expectations.

A short time since Messrs. M. M. Carrian, White & Co. passed through here on the way from Rock Creek to head of Kettle River, by way of Cherry Creek. They reported somewhat favorably of Rock Creek, but it did look strange to see them leaving. Another party passed yesterday, and did not speak "boomingly" of Rock Creek. It is probable that the reports in the Victoria papers are a little overdone.

Threshing is nearly finished in Spallumcheen valley. Ranchers report an average yield.

Mr. John Hutchinson was thrown violently from his horse at Lansdowne on Tuesday last, and severely injured. Good hopes are entertained of his recovery.

Mr. M. Hutchinson, after nine years of western life, leaves next week, with Mrs. Hutchinson, to reside near Owen Sound, Ontario.

PORT TOWNSEND SOUTHERN.

Incorporation of a New Railway to the Port of Entry.

The articles of incorporation for the Port Townsend Southern Railroad have been signed by the San Francisco capitalists interested and returned for approval. The papers were filed in Olympia on last Wednesday. Their objects are to construct, build, buy and sell railroads and steamboat lines for the purpose of transportation and carrying passengers and freight. A telegraph line will be run also in conjunction with the road. The railroad will commence on the Bay at Port Townsend, take a southward course through the counties of Jefferson, Mason, Chehalis, Thurston, Lewis, Cowlitz and Clarke, to a point on the Columbia River where the most practicable connection with railroads in Oregon can be made. The steamships will be operated on the waters of Puget Sound and the navigable rivers of Washington Territory. The company will also buy, own, sell and operate mines containing minerals in Washington Territory. The capital is placed at $3,000,000, divided into 30,000 shares at $100 each par value. Most of the stock has been subscribed for. The board met and elected the following officials: J A Kuhn, President; L B Hastings, Vice President; B C Hill, Secretary, and Henry Landes, Treasurer. This railroad will tap one of the finest agricultural regions in Western Washington Territory, and will not only prove a valuable outlet for the farmers' produce, but will open up a section of fine country for development.

TO-DAY'S DISPATCHES.

Another Race Between the Thistle and Volunteer.

Morley on Chamberlain—Stanley Pushing Ahead.

O'BRIEN WRITES A LETTER.

DUBLIN, Oct. 3.—O'Brien has written a letter in which he says: On the day of my conviction at Mitchellstown, Solicitor-General Gibson telegraphed in cipher to the Crown Counsel, "O'Brien's trial is a mistake; he will beat us. Harrington will be disbarred at our next meeting." This explained why I received three separate summonses.

STANLEY PUSHING AHEAD.

LONDON, Oct. 3.—Fresh advices from St. Paul de Loanda are that at last accounts Stanley was pushing ahead with no obstacles other than the natural difficulties of the country. On the 25th he had ascended Aruwmi to an elevated country belonging to the Mahodi district, where the river was too narrow to navigate, but boats and provisions were carried around the narrows and again launched. The country was tranquil and the natives generally friendly. Eighteen or twenty kilometers daily was the rate of progress. Tippo Tib was still at Stanley Falls awaiting reinforcements. There has been disturbances between the Falls and the confluence of the Aruwmi and Congo, some villages being pillaged.

SULTAN OF MOROCCO.

MADRID, Oct. 3.—Advices report that the Sultan of Morocco is dead.

MORLEY SPEAKS.

LONDON, Oct. 3.—Even the Tories are obliged to admit that Mr. John Morley's speech at Temple Combe, on Saturday evening, was a brilliant effort. The Tories are in fact nearly as well pleased as the Liberals over the manner in which Mr. Morley handled Mr. Chamberlain. The Birmingham politician, he said, was an Ishmaelite among statesmen. He is paying the natural penalty of being all things by turns and nothing long. Every man's hand is against him. The passage in Morley's speech which received the most approval was that in which he declared that the policy of blind, indiscriminate blundering must fail, as it would not be permitted by the justice-loving people of England. There were twenty thousand people present at the meeting and they displayed much enthusiasm.

THE PAPAL DELEGATE.

Monsigneur Persbo, papal representative, who has been studying politics and the religious situation in Ireland, is to pay another ten days visit to Dublin and will then proceed to Rome to report. No one seems to know just what ground the report will cover, and no one seems to care enough about it to even start a rumor on the subject.

FRANCE AND GERMANY.

The peculiar situation about the Franco-German frontier can hardly fail to give occasion for more episodes of an irritating character, like the Kauffman and Schnaebelen incidents, but the sensible attitude of the two governments in these cases make it almost certain that no such flimsy pretext will be allowed to give rise to hostilities. The general feeling in diplomatic circles has been greatly improved by the outcome of the recent frontier shooting affair. The probability of war during *regime* of the present ministers will be reduced to a minimum.

THE MINERS.

The agitation among miners has spread to Derbyshire. Workmen in that district have just held a conference, at which it was decided to petition for eight hours a day and other improvements in their lot. Socialistic ideas are said to be making rapid progress among the miners. Heretofore they have been a surprisingly Conservative class, probably because though poorly paid work is tolerably constant. Whatever may be true of the other classes of laborers there is no doubt the English miner is better off than his American fellows. The accounts of the condition of miners in Pennsylvania, represented from American papers, have furnished rampant free traders with arguments of more or less plausibility.

BICYCLING.

At Leicester yesterday Woodside, the American bicyclist beat Howell, the English champion in a ten-mile race.

RANSOMED.

SMYRNA, Oct. 3.—Four Englishmen were recently captured by brigands near here and have been released upon the payment of a ransom.

CONSTANTINOPLE, Oct. 3.—The last note sent to Russia by the Porte suggests that both Russia and Turkey appoint commissioners of princely rank, who shall govern Bulgaria for three months. They are to convoke a new Sobranje, which will elect a Prince.

IRISH TRADE.

LONDON, Oct. 3.—The Commercial Co., of which Mr. Davitt is a member, has contracted to ship four tons of woolens weekly to Boston.

AMERICAN NEWS.

VOLUNTEER AND THISTLE.

NEW YORK, Oct. 3.—There are some prospects of another race between the Volunteer and Thistle. Bell is anxious to have another "go" at the Volunteer and General Paine seems not unwilling. Though no official action has yet been taken it is understood Bell and Paine will talk the matter over. Paine said tonight he had heard of the desire of Bell to have another contest, but had not been officially notified. "When I do," he added significantly, "I'll be ready."

THE WARPATH.

FORT CUSTER, Mont., Oct. 3.—Telegraphic advices from Fort Shaw are to the effect that a band of Crows are on the warpath against the Piegans and whites. The authorities are powerless to arrest them, and extensive trouble is feared. More Crows are expected to go on the warpath, and a general feeling of alarm prevails. Troops are being sent forward.

Monster Sturgeon.

LADNER'S LANDING, Oct. 3.—A sturgeon was caught here by Laidlaw's fishermen last night. Its length is 11 feet 9 inches; girth, 6 feet 7 inches; weight, 822 pounds.

MORE SEIZURES.

SAN FRANCISCO, Oct. 3.—The revenue cutter Bear arrived from Alaska last night, reports the seizing on Aug. 24th of the British sealing schooner Ada with 1200 skins, the American schooner Allie Folger with 1600 skins, and the American schooner Handy with 1700 skins. The Bear brings sailor Vincent, sole survivor of the whaling bark Napoleon, wrecked in the Arctic in 1885.

A SEATTLE HUGHES-HALLETT.

Criminal Conduct Charged Against a Well-known Citizen.

L. R. Shaw, a well-known citizen of Seattle and real estate speculator, has been arrested on a charge of rape. The victim alleged is Shaw's own daughter-in-law, a child but twelve years old when the crime was first committed. She is now but fourteen years old and criminal relationship has existed between the two during all the intervening time. A *Post-Intelligencer* reporter elicited the following from Mrs. Shaw, who made the charge: Mrs. Shaw was the widow of Loring Holbrook, living upon a ranch in Lewis county when Shaw sued for her hand and won it. She was worth at that time about ten thousand dollars. That was two years ago last May. She came to this city but was compelled to return to her ranch in September, leaving her twelve-year-old daughter to remain here at school and in care of her husband. "No woman ever had greater faith in a man than I had then in him," said she, "but it was then, when he had the child completely in his charge, that he accomplished her ruin. We had been married but three months. Soon after I came here I became aware of their relationship. I was driven to madness by the realization of it, but I hoped to conceal the facts from the public for my child's sake. I sent her away to my sister's, but he went after her at once and compelled her to return to her home. Then I pleaded with her on my knees not to submit to him, but he laughed and said to her 'Iola do not mind what she says.' He had complete power over her and I could do nothing. Oh how I have pleaded with him, but he only mocked me. I wonder if God could know the agony that I have suffered day after day in this little house alone with that man and my poor child through these long two years. They became so bold, however, that they did not mind my presence and I have repeatedly been witness to the terrible crime. I stood in mortal agony of making it all public. Twenty times I have started to the court house to tell the judge, but something always told me not now, not now, and I would turn back. Yesterday I started again determined to tell all and save my child, and it seemed as though I could not get there fast enough. So it seems as though there was some power ordaining it. I did not know that the court was in session. I told the Probate Judge and Prosecuting Attorney. Told them that I placed my life in their hands, for he had threatened to kill me if I ever told on him. They brought me and my child before the Grand Jury to-day. She denied the truth of what I said for a long time, but finally confessed it all. I am penniless now. He has mortgaged my farm and spent my money, but I am determined to at least save my child from him." Shaw is a man about 50 years of age, of large frame and striking military bearing. He wears a heavy grey moustache and considerable jewelry. The child in the case is quite pretty and unusually well developed for her age. She is still living with her mother.

Shaw's son, the young man who ordered Mrs. Shaw out of the house to-night, is the same, who, while out hunting recently, accidentally shot and killed his brother-in-law, John F. Rice.

A BUSY SCENE.

Loading and Unloading the Port Victor at Vancouver.

No sooner had the Port Victor reached the C. P. N. wharf at Vancouver on Thursday night than the unloading commenced. The first taken out was a consignment of silk for New York. Six cars were speedily loaded and sent off at an early hour on Friday, followed in the afternoon by 12 cars of tea, and on Saturday morning by another train of miscellaneous. The work of unloading was kept up without intermission excepting the meal hour. So soon as part of the cargo was cleared from one hatch the work of loading for the outward trip began. A train of 21 cars of manufactured cotton in bales of 500 lbs. each was standing on the side track close to the ship. At the far end of the vessel coal was being loaded from the Robert Kerr. In all, in and about the Port Victor, there were 150 men at work loading and unloading. These with the multitude of onlookers and the puffing locomotives, the snorting engines and the ringing bells on Sunday last gave visitors and new arrivals from the east the impression that commerce knows not nor does it regard the Lord's day more than any week day. It was indeed a busy scene, reminding one of the great shipping ports of Britain, San Francisco, or New York.

THE PORT VICTOR'S CONSIGNEES.

Following are the Port Victor's Victoria consignees: Welch, Rithet & Co, Tai Foong, Order Chan Yee Long, Lin Cheong, Fook Hing, Quong Tai Lung, Chan Yuetong, Kwong Cheong; Ho Kwong, Cheong Wah, Tai Soong & Co, Order, King Tai, Cheong Leong, Hip Lung, Yin Loong, Wah Yuen. Above are from Hong Kong. From Foo Chow: Order. From Kobe, Chas. Gabriel & Co. From Yokohama, three consignments to orders, Seigfriend & Brandeutean. The consignments to Victoria consist of teas, rice, opium, oils, silks and fancy goods. The total weight amounts to 204,829 lbs., or 102 tons weight.

To Ald. Humphries, and Mr. G. C. Webster of H. M. Customs, Vancouver, we are indebted for courtesies shown and information obtained.

The Port Victor will leave Vancouver on Friday and sail from this port early Saturday morning. Her cargo will consist of manufactured cotton, flour, merchandise and coal, of which she will carry from Vancouver some 2000 tons.

Don't

let that cold of yours run on. You think it is a light thing. But it may run into catarrh. Or into pneumonia. Or consumption.

Catarrh is disgusting. Pneumonia is dangerous. Consumption is death itself.

The breathing apparatus must be kept healthy and clear of all obstructions and offensive matter. Otherwise there is trouble ahead.

All the diseases of these parts, head, nose, throat, bronchial tubes and lungs, can be delightfully and entirely cured by the use of Boschee's German Syrup. If you don't know this already, thousands and thousands of people can tell you. They have been cured by it, and "know how." It is a medicine. Bottle only 75 cents. Ask any druggist.

THE MAINLAND.

The long looked for railway era may now be said to have reached this province, and the mainland in a greater degree than any other section is deriving benefits therefrom. Along the line from the fresh water and the deep sea termini to the eastern limit of the province the same story reaches us, that of general prosperity. Sympathizing with the development taking place in the agricultural and mineral districts, old cities and towns are progressing, whilst new centres are arising, claiming a share of public favors and recognition at the hands of the authorities. The district tributary to New Westminster, which for its extent and varied soil may be classed as the leading agricultural section of the province, is settling up at a rapid rate. Along the banks of the Fraser, from its mouth to Popcum, are to be observed new settlements, whilst villages such as Port Hammond and Port Haney, Langley, the Mission, Sumas and Chilliwhack Landing, are springing into prominence as distributing and shipping centres. Back from the river banks, especially on the south side, land is being rapidly taken up by actual settlers, who are arriving from the east, Britain and the continent in great numbers. Illustrating the manner in which land is being settled upon it may interest our readers to learn that since the first of last August the number of homesteads entered in the Dominion Land office at New Westminster to last Saturday, was four hundred and fifty-three. These are heads of families, and represent a considerable rural population. Old settlers, owning large tracts of land, are either cutting up their holdings or making extensive clearances. This is a commendable course, as with the influx of settlers the demand for all classes of farm produce will increase, and we are pleased to learn that our farming readers are learning to appreciate the advice repeatedly tendered them to take steps to put a stop to the enormous drain there is yearly going on in connection with the imports of farm, dairy and other produce. It will be some years yet ere we expect to reach that happy stage when we will be enabled to turn the tables on our neighbors and become exporters; they then becoming our "hewers of wood and drawers of water." But that period is approaching, unless we are greatly mistaken. It is true the homemarket is a good one, and farmers who are unable to make money when they are selling their hay at from $18 to $22 per ton, barley, wheat, oats and peas at 1½c. to 2c. per lb., potatoes at 1 to 1½ cents per lb., and similar prices throughout, to say nothing of butter at 30c. to 40c. and cheese at 15c. per lb., we fear will never have a better opportunity than the present to enrich their coffers. That they are succeeding as a class better than their fellow citizens in other avocations of life is a certainty, for everywhere are to be observed evidences of accumulating wealth and comfort. There still remains many thousands of acres of excellent virgin soil for the incoming husbandman, rich in soil and capable of producing crops the like of which few countries can rival. The railway has proved itself to be a great colonizer for British Columbia. Without it the people who are pouring in to inhabit the earth would still remain in other climes. Its advantages in this respect alone is of incalculable benefit. The steamers ploughing the natural highway—the majestic Fraser—are extremely accommodating, for whenever a flag is hoisted or a signal given a landing is made and the farmer accommodated by having either himself, his family, or the product of his farm taken on board, and rapidly conveyed to the seaboard cities. Roads lead back from the river to the settlements. Many of these, however, are in a bad state of repair, and require attention by the government. The officers on the steamers are obliging and courteous, giving farmers every facility to move their prpduce with the least possible difficulty. Thus it is that farming in the Fraser River Valley is pleasant as well as lucrative.

In the interior, east of the Cascades, Kamloops, Revelstoke, Illecillewaet, Donald and other points are looming up. Kamloops, which claims to be the inland capital, is growing rapidly. The surrounding district is in sympathy with it and also developing the great natural resources which abounds within its borders. As we proceed eastwards the Okanagan and Spallumcheen districts are also forging ahead and becoming famous as their extent as agricultural districts become known. The mountains are being scoured by prospectors in quest of the precious metals. Already the Illecillewaet district, in the Selkirks, is becoming a noted mineral center and a town is springing up here as if by magic. Other mountain towns are likewise flourishing.

But the railway era is evident on the Island as well as on the mainland. Along the line of the Esquimalt and Nanaimo railway evidences are observable of substantial advances being made. That which not long since was an impenetrable forest is now the scene of many houses. The traffic on the line sympathizes with the growth of the district, and is daily on the increase. In a few weeks the iron horse will cross the harbor and reach the centre of the city. With it will come an increase in the business to be done in the city by the wholesale and retail traders. The railway era will benefit Victoria, from every standpoint, to as great a degree as any other place in the province. As the mainland prospers, so will the capital city. With the increase in the population on the Island and the West Coast generally, Victoria will likewise expand. She has everything in her favor in this respect, and her merchants are too shrewd to allow any opportunity of advantage to slip through their fingers.

GROWTH OF THE EMPIRE.

A Melbourne paper, with its jubilee number, presents to its readers a map of the world on Mercator's projection showing the British possessions wherever they exist, with statistical tables exhibiting the progress made during the reign of Queen Victoria. The compiler of these statistics has divided the British Empire into the following groups: The United Kingdom, the Dominion of Canada, British West Africa, South Africa, and the Indian Empire, and Australia, giving for each group the extent of territory, the population and the value of its trade at the periods of the Queen's accession and the jubilee year. As may be expected the trade returns from India and Australasia show a very rapid increase, that of India being more than five times greater than it was in 1851, and during the same period the trade of Australasia has increased twelvefold. The six divisions taken together give the following comparative results for the entire British Empire:

	Square Miles.
Area in 1837	2,254,905
Area in 1887	8,562,930
Population in 1837	136,106,000
Population in 1887	292,761,000
Trade in 1837	£238,000,000
Trade in 1887	£1,078,000,000

Since 1837 the area of the empire has increased fourfold, so that, while the queen received 2,000,000 of square miles from her ancestors, she will transmit 8,000,000 to her successor. The population of the empire has doubled, and its trade has increased fivefold. Without wishing to boast or to draw invidious comparisons, it may safely be stated that, although the prosperity reached in the Elizabethan and Georgian eras was remarkable, that of the Victorian era throws both considerably into the shade, while comparative history in the present day contains nothing superior to the present position of Great Britain as head of its empire possessions.

PERSONAL AND POLITICAL.

The personal charges against Hon. A. W. McLellan, who has been unseated, have been dropped.

The Tay canal (a sop to a Conservative constituency and an unnecessary piece of work), has been completed and the contractor, Mr. A. P. McDonald, has been banqueted by the citizens of Perth.

An Edinburg merchant of the sixteenth century left behind his ledger. On its flyleaf is written: "God blis this Buik an' keip me an' it honest." The lack of living up to such an inscription is rapidly recruiting the American party of Canada.

There are only 400 Mormon bishops in Utah, 2,423 priests, 2,947 teachers and 6,854 deacons. Seems to be a surplus of deacons. The whole outfit is busy tithing. Every Mormon has to give the church a tenth of his gains every year.

Mr. Whitaker Grant, of Davenport, Iowa, appointed United States District Attorney for Alaska, is said to be a ripe and forcible lawyer. He is a brother of Governor Grant, of Colorado, and a nephew of Judge Grant, of Fresno, California.

It is stated that Mr. Barwick, barrister, and president of the Toronto Conservative association, has been appointed inspector of the postoffice department. Mr. Sweetman, the present inspector, will be transferred to Ottawa to succeed Mr. Dewe, who will be superannuated.

Mr. Chamberlain informs the Globe correspondent that he will leave England in October, go straight to Washington and commence work on the commission in November. It is understood Newfoundland will be asked to send representatives to Washington to take part in the discussions of the commission without the power to vote.

The petition against the return of Sir Charles Tupper as the federal representative of Cumberland county, will come up in the courts next Tuesday. It is understood that Tupper's counsel will acknowledge bribery by agents. This will void the election and unseat Sir Charles Tupper. The personal charges will be dropped.

Sir Arthur Blackwood, who has sailed from New York for England, states that in his opinion the C. P. R. route for the mail service to Japan and China would save little in point of time over the Suez canal route, its advantages being national rather than postal. He admits that it would be of the utmost value as an alternative route in case of war or European complications.

Mr. Caine, M. P., writing about the result of his inquiries in Quebec and Montreal respecting the iron and steel duties, says he has no fear whatever of a disastrous result to the English iron trade. Canada will continue to buy from England in increasing quantities. Any capitalist fool enough to start an extensive iron works in Canada, he says, will end in a first-class collapse.

THE LAND BOARD.

A Meeting at Kamloops—A Memorial from Settlers.

A special meeting of the Dominion Land Board was held in the court house on Saturday last to gather information from settlers in this vicinity with regard to the disposition of lands in the railway belt. Messrs. H. B. W. Aikman, Dominion lands agent, T. O. Higginson, dominion timber agent, Westminster; and William Pierce, dominion lands commissioner and inspector of mines, Ottawa, composed the board. A number of the leading men of the district and town, together with recent settlers and squatters in the railway belt, attended the meeting and placed the state of affairs before the board.

The following memorial was drawn up and forwarded to the minister of the interior:

Hon. Thos. White, Minister of the Interior.

Your memorialists, at a meeting held the 25th of September; afterward met the land board and offered the following suggestions for the settlement of the Dominion lands, embracing ranges 12 to 21 inclusive—

1. No lease to be granted of said lands.

2. Lands to be reserved from sale excepting according to clauses 4 and 6.

3. Lands to be open to pre-emption according to Dominion Lands Act, excepting that parties can have 320 instead of 160 acres.

4. Any parties pre-empting will have the right to bond 640 acres adjoining his pre-emption, which they can purchase at $1 per acre, on completion of their titles and patents for the land.

5. Prices of land to be meadow and agricultural land $2.50 per acre; pasture land $1 per acre.

6. All parties holding land by pre-emption from the Local Government shall have the right to purchase 640 acres, and no more, adjoining the pre-emption

(Signed) JAS. McINTOSH, Ch.
G. B. MARTIN, Sec.

The board will report to the government advising it as to the action to be pursued. It is almost a certainty that the disposition of the lands will be made in accordance with the plan submitted in the memorial, which no doubt will be satisfactory to old and new settlers.—*Sentinel.*

AYER'S PILLS. Sugar-Coated Cathartic

If the Liver becomes torpid, if the bowels are constipated, or if the stomach fails to perform its functions properly, use Ayer's Pills. They are invaluable.

For some years I was a victim to Liver Complaint, in consequences of which I suffered from General Debility and Indigestion. A few boxes of Ayer's Pills restored me to perfect health.—W. T. Brightney, Henderson, W. Va.

For years I have relied more upon Ayer's Pills than anything else, to

Regulate

my bowels. These Pills are mild in action, and do their work thoroughly. I have used them, with good effect, in cases of Rheumatism and Dyspepsia.—G. F. Miller, Attleborough, Mass.

Ayer's Pills cured me of Stomach and Liver troubles, from which I had suffered for years. I consider them the best pills made, and would not be without them.—Morris Gates, Downsville, N. Y.

I was attacked with Bilious Fever, which was followed by Jaundice, and was so dangerously ill that my friends despaired of my recovery. I commenced taking Ayer's Pills, and soon regained my customary strength and vigor.—John C. Pattison, Lowell, Nebraska.

Last spring I suffered greatly from a troublesome humor on my side. In spite of every effort to cure this eruption, it increased until the flesh became entirely raw. I was troubled, at the same time, with Indigestion, and distressing pains in

The Bowels.

By the advice of a friend I began taking Ayer's Pills. In a short time I was free from pain, my food digested properly, the sores on my body commenced healing, and, in less than one month, I was cured.—Samuel D. White, Atlanta, Ga.

I have long used Ayer's Pills, in my family, and believe them to be the best pills made.—S. C. Darden, Darden, Miss.

My wife and little girl were taken with Dysentery a few days ago, and I at once began giving them small doses of Ayer's Pills, thinking I would call a doctor if the disease became any worse. In a short time the bloody discharges stopped, all pain went away, and health was restored.—Theodore Esling, Richmond, Va. ††

WHAT SHALL WE WEAR?

A PETTICOAT WITH TOURNURE FOR LITTLE GIRLS.

A Description of Some of the Finger Rings Worn by Both Sexes—An Attractive Summer Wrap—A Checked Cloth Costume for Country Wear.

The costume in the illustration is made of green and brown checked cloth and is suitable for country wear. The collar, pockets and cuffs are of light brown cloth, trimmed with cord of both colors. The pointed fronts of the drapery have two long crossway ends joined in a double knot behind. The basque of the bodice is slashed at the back and the sides. The brown straw hat is trimmed with green and brown feathers.

NETTED MANTLE. CLOTH COSTUME.

The remaining figure shows a small netted mantle, very light and well adapted to the warmer days of summer. A bead passementerie trimming, a fringe of grelots, and bead loops on the back, fronts and sleeves, lace on the top and bottom, and bows skillfully placed here and there, make the whole into a very elegant little wrap. The small open work straw bonnet in the illustration is trimmed with coquer red ribbons, embroidered crape and a rucking of cock's feathers.

LITTLE LAUGHS.

"Yes, dear, we're enjoying Bath Beach immensely. There is such lovely bathing and boating, et skeetera, et skeetera.—New York Sun.

"Advice to Husbands."

Keep the house neat. No woman likes to come home and find the house littered up and everything upside down and scattered around. This has driven many a wife away in disgust. In addition to this take pains to be dressed in a pleasing but not gaudy manner. She don't like to come home and find you looking like a professional slouch in your shirt sleeves, with

your feet on the mantelpiece, the house full of five cent cigar smoke, children not washed or dressed, nor the beds made. Always wear your best when she comes home, and she cannot fail to notice in a few weeks how pretty you look, and think better of you for it. All these things have their effect.—Walt McDougall in New York World.

Things One Would Rather Have Left Unsaid.

She—No! I can't give you another dance. But I'll introduce you to the prettiest girl in the room!

He—But I don't want to dance with the prettiest girl in the room. I want to dance with you.—Punch.

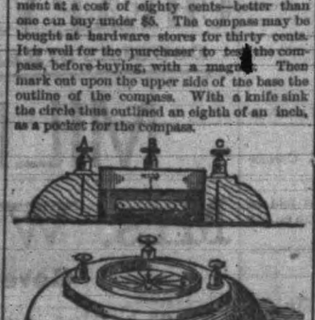
SCIENCE AND PROGRESS.

THE NEW PAVING STONE FROM THE PRAIRIE REGION.

A Simple but Useful Galvanoscope for Amateur and Professional Electricians. Steam and Exhaust Pipes—Trichinæ in a Human Body.

A New Jersey correspondent in Scientific American tells how to make a useful and inexpensive galvanometer.

A hardwood base, a few inches in diameter and about an inch in thickness, carries a small pocket compass, set firmly into the base over a silk insulated wire, the ends of which are attached to binding posts on the upper side, and can be made a neat instrument at a cost of eighty cents—better than one can buy under $5. The compass may be bought at hardware stores for thirty cents. It is well for the purchaser to test the compass, before buying, with a magnet. Then mark out upon the upper side of the base the outline of the compass. With a knife sink the circle thus outlined an eighth of an inch, as a pocket for the compass.



A SIMPLE GALVANOMETER.

Cut the wood so as to form a bobbin, upon which is wound wire, as shown in the upper sectional view. This should be laid carefully, one end being left for attachment to binding post A, and the wire being wound about the core by passing the other end through the openings, and then attaching it to the binding post C. About twenty feet of good quality, silk covered wire, of size between 20 and 22, is amply sufficient. After the wire has been wound upon the core there may be attached to it, with a little care, at its middle, a short piece that will connect with a third binding post B. This will make a short circuit of one-half the length of the wire when terminal A or C is connected with terminal B. A fine gimlet hole will serve to carry each end to its binding post, where it is best attached to the foot of the post, leaving the holes in the posts for other connections. A circular piece of tin may then be fastened to the base, so as to cover the wire, and the whole base may then be varnished or oiled to suit the fancy. The compass may be firmly united to its receptacle with a bit of Chatterton compound or glue, care being taken to set it perfectly level.

An instrument thus constructed will be sensitive to delicate currents, and forms a useful galvanoscope for amateur and professional electricians.

Poetry and Prose.

She—What a lovely summer afternoon. How resplendent the bright orb of day hangs in the blue vault above.

He—Yaas, nice day for a fellah to get his hair cut, extra cuttings.

The New Waterproof Garments.

Since manufacturers have succeeded in rendering various materials waterproof the once unattractive waterproof wrap or circular has changed from its dark chrysalis shape to a pretty spring butterfly. Thus this hitherto merely useful garment is now made in wool and silk of every fashionable pattern and color, and is an elegant as well as practical addition to a lady's wardrobe.

Lace Suits.

Lace will be extensively used as the warm weather comes on, both in black and white for entire suits. Nothing is more beautiful or makes a more airy, graceful costume, and the Spanish and Chantilly all-over skirting is now so low priced that almost any one can afford a dress of one or the other.

Tournure Petticoat for Girls.

With the present bouffant style of drapery even little girls wear quite full skirts, and these require a petticoat with more than usual fulness at the back to wear underneath.

PETTICOAT FOR LITTLE GIRLS.

Our illustration gives an excellent model with a tournure back. The top is seven and one-half inches long, and set over the gathered skirt, which is one yard twelve inches wide. Three box plaited flounces, each nine and one-half inches deep, of coarse cotton material woven with rows of cord, are set on to imitate a tournure. All the models in this issue are furnished by The Season.

Bad Language

Miss Betsy Primme—He really is such an ugly looking devil, you know.

The Vicar—Well, he is!

Hostess (who overhears)—My goodness, gracious me!

They were only discussing the Mephistopheles of a provincial dramatic company.—London Punch.

—Strong, serviceable umbrellas, suitable for school children, 75c each, at Jeffries', Yates St. *

—Messrs. McDiarmid & Ross have stopped work on their mine at Illicillewaet for the winter.

—Mens', Youths', and Boys' Rubber Coats at reduced prices, at Jeffries', Yates St. *

—Steitz Bros. are prepared to supply their celebrated ICE CREAM in quantities to suit, by the glass, quart or gallon. *

—Green Turtle, Terrapins, Frogs and Eastern Oysters just received at the POODLE DOG. *

—The Ogilvie Mining Co., of Winnipeg, will shortly send another large shipment to the Orient—this time to Hong Kong.

The only place in the city for a glass of British Beer on draught is the Occidental Hotel. XXX Edinburgh and XXX Burton. WM. JENSEN.

—No contract has yet been awarded for the reconstruction of the Englishman's River bridge. The tenders received were considered too high.

—The WASHBURN GUITAR is the best and most perfect instrument of the kind made. A fine assortment always kept at M. W. WAITT & Co.'s, Agents for B. C. *

—The weekly mail service between Nanaimo and Alberni will commence this week. Mr. Armstrong, of the latter place, has the contract.

—You can have Brown's celebrated CLIMAX WASHING POWDER at greatly reduced prices, manufactured by PENDRAY & Co., Humboldt street, Victoria. *

—J. J. Grant, of Comox, has grown a three-pound potato. The editor of the Nanaimo *Free Press*, who ate it, is quite certain it was not a pumpkin.

—Pendray & Co. have only sent a part of their No. 1 soap east. You can have your orders promptly filled by them on Humboldt street. *

—William Franklin died at the Nanaimo hospital on Thursday evening from pneumonia. He was aged 32 years, and a native of Bristol, England.

—See the new dress stuff that is selling at the Lansdowne House, Yates street. 8 yards for $1. *

JOHN PARTRIDGE, Proprietor.*

—Families requiring extra quantities of sugar for preserving purposes will find it to their advantage to purchase at FELL & Co's. *

—Tomb and Headstone, Monuments, in Marble, imported and local Granite. Mantle piece and Wash Stands in Marble, artistically executed, and at reasonable rates, at George Rodger's Marble Works, Douglas street, Victoria. Call and see specimens of work. *

—The people east are good judges of soap, that's just the reason they buy largely of Pendray & Co. We keep a full stock on hand of soap that is soap. You try it. *

J. PARTRIDGE, Proprietor.*

—Collections at the Nanaimo custom house for September were as follows: Import duty, $4674.45; sick mariners' dues, $377.56; petroleum inspection, $8.80; steamboat inspection, $5.96. Total, $5066.07.

—Lieut. Col. Houghton and Dr. Asliddown, of Winnipeg, were fined $10 each for shooting grouse out of season. In driving over the prairie a covey of birds crossed their path and without thinking of the close season they shot a couple of them.

—Sufferers from the effects of quinine, used as a remedy for chills and fever, should try Ayer's Ague Cure. This preparation is a powerful tonic, wholly vegetable, and without a particle of any noxious drug. Warranted a sure cure.

☞—F. W. Sullivan, head carpenter of the Tacoma mill, was caught by some of the machinery in that concern and drawn through an aperture but eight inches square. The escape from death was almost miraculous and due to the fact that Mr. Sullivan is very spare in his build.

—"I have taken within the past year several bottles of Ayer's Sarsaparilla, and find it admirably adapted to the needs of an impoverished system. I am convinced that this preparation, as a blood purifier, is unequaled." C. C. DAME, Pastor Congregational Church, Andover, Me.

Too True.

Anderson & Hastie are still giving bargains in all kinds of furniture, including parlor, bedroom and dining, window shades and picture frames. *

Enlarged and Improved.

Our sprightly Kamloops contemporary, the *Sentinel*, has grown in stature this week and is now a full-fledged eight-page paper, replete with local and general news. It deserves and will command success.

Contract Let.

The second forty miles of the Seattle, Lake Shore & Eastern Railway, it is said by the Seattle papers, has been let to Geo. W. Hunt, a prominent contractor. The engineers' estimate of the cost is $1,000,000.

Fire on Saanich Road.

Early on Sunday morning Mr. Heal's barn, on the new Saanich Road, was burned to the ground. The loss will fall heavily on Mr. Heal, as the barn was a new one and contained this year's crop, besides a wagon and farming implements. The loss is estimated at $2,000.

Tony Cigars,

Fire at Nanaimo.

On Sunday evening, about 7 o'clock, fire broke out in T. E. Peck's livery stable. In a few minutes both engines were playing good streams on the building, but the fire gained too much headway, and the building was destroyed. All the horses and some of the carriages were saved. Loss and insurance unknown.

Praise from St. David.

The Leland, Vancouver.

Mr. Prout, late of the Brunswick, in this city, has purchased the Leland House, Vancouver, from Mrs. Hirschberg, who owns the building only, which is erected on leased ground. The price paid was $10,000. The stand is a good one. Mr. Prout is well known to Victorians as an affable, courteous landlord. Mr. John Insley, late of the Colonial, New Westminster, will have the management of the hotel under his control. Few men are better known than is Mr. Insley to the traveling community. Under his management the Leland will become one of the most popular hostelleries in the country.

Really! The Creme de la Creme.

Tobacco Growing.

The Nanaimo *Free Press* says that Mr. William Lewis, a prosperous settler of Comox, attempted this year to raise tobacco plants, and has succeeded beyond his anticipations. The leaves have grown to a large size, demonstrating beyond a doubt that the warm valley of Comox and the other valleys of this Island are finely adapted to tobacco culture. Several specimen leaves have been sent to this office. To all appearance they are equal to the plants grown in the said to be more favored countries. While tobacco is so generally used, we see no reason why the raw material should not be grown in this province. It could also be cured here and made ready for consumption.

Sec. Bayard's Foolishness.

WASHINGTON, Sept. 29.—Secretary Bayard says he does not believe the story, recently telegraphed from Ottawa, that the instructions sent to Judge Dawson in January last, by Attorney-General Garland, to liberate the British sealers Caroline, Onward and Thornton have been disobeyed. The Secretary said to-day that as soon as the international point growing out of the capture of the British sealers was brought to his attention, he promptly consulted with Attorney-General Garland and from him learned the legal points in the case. There are several law questions involved, which can only be settled by the courts after due deliberation. In the meantime the vessels and crews are not detained by the United States authorities, and the owners can have them if they will go or send after them. The vessels in question are deckless boats or fishing smacks of but little value, which probably accounts for the lack of inclination on the part of their owners to go after them. They are beached in a rough, rude region, about 200 miles from any settlement and their owners probably do not consider them worth going after. One of the main points which led to the discontinuance of the proceedings with regard to these vessels was their trifling value, and up to the present time the United States has not been willing to pay a single cent in damage.

Spring Ridge School.

The new school-house in the Spring Ridge section of the city, was opened to-day at 9:30 a. m., when fifty pupils were present. The teacher is Miss L. Horton. The superintendent of education and Trustee Walker were present and spoke words of encouragement to the pupils. The school building is a good one, the seats being nicely varnished, and there is attached a playground divided for boys and girls.

Obituary.

Mrs. Bridget Gilligan, wife of Patrick Gilligan, died this morning at her residence, Pandora street. She was 52 years of age and a native of Sligo, Ireland.

Miss Mary Amelia Wark died this morning at her mother's residence, James Bay. Deceased has been ailing for a long time, and at last has fallen a victim to the insidious disease, consumption. She was twenty-one years of age, and a favorite with her companions.

Catarrh, Catarrhal Deafness and Hay Fever.

Sufferers are not generally aware that these diseases are contagious, or that they are due to the presence of living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research, however, has proved this to be a fact, and the result is that a simple remedy has been formulated whereby catarrh, catarrhal deafness and hay fever is cured in from one to three simple applications made at home. A pamphlet explaining this new treatment is sent free on receipt of stamp, by A. H. Dixon & Son, 305 King street West, Toronto, Canada.—*Christian Standard.* *

Blue Ribbon Club.

The reopening on Saturday night was a grand affair and drew a large audience. The president, Mr. Gray and Rev. Wadhams, delivered speeches, and Mr. A. J. McLellan made a few remarks regarding the prosperity of Prince Edward Island under the prohibition flag. The band played several fine selections and a number of ladies sang pleasing solos. The playing of Miss North, accompanied by the Masters North on the piano, violin and cornet, received an encore. The Misses Luney favored the audience with a fine duet. Everything passed off pleasantly and the Blue Ribbon Club will hold meetings every Saturday evening.

Gladstone Cigars.

What Am I To Do.

The symptoms of Biliousness are unhappily too well known. They differ in different individuals to some extent. A Bilious man is seldom a breakfast eater. Too frequently, alas, he has an excellent appetite for liquids but none for solids of a morning. His tongue will hardly bear inspection at any time; if it is not white and furred, it is rough, at all events.

The digestive system is wholly out of order and Diarrhoea or Constipation may be a symptom or the two may alternate. There are often Hemorrhoids or even loss of blood. There may be giddiness and often headache and acidity or flatulence and tenderness in the pit of the stomach. To correct all this if not effect a cure try *Green's August Flower*, it costs, but a trifle and thousands attest its efficacy. *

Black and Tan Cigars,

Messrs. M. Steeve & Son, of Luin Island, are importing a couple of car loads of Holstein cattle from eastern Canada. It was intended that these would have reached their destination in time for the Provincial exhibition, but an unforeseen delay occurred in the shipment from the Ontario provincial at Ottawa. The animals have been selected from the best herds in the east and are all registered in the Canadians Herd Book. Prior to deciding upon selecting the Holsteins Mr. Steeve, Sr., visited many of the farmers' herds on the coast, the northwest as well as those of Ontario and Quebec. He compared carefully the respective merits of the several breeds and finally decided in favor of the Holsteins, which are now becoming very popular on account of their being an excellent dairy as well as a beef producing animal and supposed to be specially adapted to the district in which they are to be located. The Messrs. Steeve rank high as enlightened, energetic farmers and stock raisers. It is to be hoped their enterprise will meet with that success which it deserves and that others will follow their example in importing Short Horns, Herefords, Devons, and the Polled Angus, all of which are classes certain to prosper in this country.

POLICE COURT.

His Worship Mayor Fell occupied a seat on the bench. After a large number of drunks had been disposed of in the customary manner, the following cases were heard:

Harry Tescag and Robert Christie were charged with unlawfully assaulting David Davis, bartender at the Prince of Wales saloon.

Mr. Davis said he was going home at 3 a. m. on Sunday when the defendants assaulted him and tore his clothes. He did not wish to press the charge. The men were fined $5 each and $2 costs.

John Johnson, charged with creating a disturbance on Fort street at a meeting of the Salvation Army. Mr. J. P. Walls appeared for the defence. The evidence of Officer Robb went to show that defendant was trying to get into the hall when the caretaker was holding the door to keep him out. A disturbance ensued and defendant was arrested and handcuffed. The case was still in progress.

The *Chinese Times, North China Daily News* and *Shanghai Mercury*, all combine in saying more or less emphatically that the great Mitkiewitz scheme is likely to end in a fizzle. The anti-foreign party has been roused into violent opposition, and their spirit is gradually reaching the official classes, the high manchus and the army.

M. W. Belknap, who was Secretary of War under President Grant, is living in seclusion in the little village of Powhatan Court House, a few miles south of Richmond, Virginia. He spends his time reading and in cultivating flowers. Mrs. Belknap spends her time between London and Paris, and may, on any fine day, be seen driving in Hyde Park or on the Bois.

Claus Spreckels, of California, who has been termed the Sugar King of the Sandwich Islands, is a German who began his life in the West as the keeper of a grocery store. He was an expert chemist, and invented some new process for refining sugar. It was estimated three years ago that he made six hundred barrels of sugar a day, each barrel worth $30, thereby giving him an income of $6,570,000 a year. His wealth is now estimated at $25,000,000. Mr. Spreckles is an old man, but he is still very active and energetic. He speaks with a strong German accent, is simple in his dress, and domestic in his habits.

MARINE.

The ship A. G. Ropes sailed on Thursday from Tacoma with the largest cargo of coal that ever went out of the Straits of Fuca. She carried 4480 tons and drew twenty seven and a half feet of water.

A franchise having been granted to the Spreckels Brothers Commercial Company to build a wharf in San Francisco, construction will begin at once. The wharf will be 2,082 feet in length and seventy-five feet wide, and will afford ample accommodation for the firm's business for some time to come. It will cost about $100,000, and when completed will be equal to any on the coast.

Ship owners of the coast, besides having a plan to bring sailors from the eastern coast to supply the demand and reduce wages, are thinking seriously of importing deep water sailors from Hong Kong, the Chinese and Japanese coasts and Australia to go on the coast until the present rush is over.

HARMONY IN THE CHURCH.

TO THE EDITOR OF THE TIMES:

SIR,—As most of your readers are aware the different churches in Victoria have been celebrating the harvest festival, and in a commendable spirit. Musical amateurs have assisted the choirs in the different churches, without respect to sects or creed and with the approval of people and priests. We regret to state that there has been one exception to this. Englishmen may not be very proud that the small mindedness was displayed by a gentleman in connection with the Church of England. Last Sunday a popular and obliging young gentleman was to take part in a quartette at the Cathedral; when he received a message from the Bishop that he would not be allowed to sing as he had assisted the Catholics on a previous occasion. We wonder how many Catholics are paid for singing in the cathedrals and churches in Britain? No one seems to enquire if they sing in the opera or music halls during the week, if they only sing well in church on Sunday. But perhaps few of them are guilty of assisting a rival church as our young friend was. CHORR.

Cimon, conservative, was elected on the 27th ult. in Charlevoix, Que., by a majority of about 500 over Tremblay, liberal.

Telegraphy in Dakota.

A man from the East was visiting a friend in a Dakota town. One day he came into his friend's office and said:

"I got a telegram about a half hour ago and have been studying on it ever since, but can't make anything out of it. I'm afraid some of my family are sick."

"Is it the first one they brought to you?" asked his friend.

"Yes."

"Oh, well, it isn't intended for you then—they never strike it right the first time. Let me see it."

He took it and read as follows:

MPSCUS, June 8.—J. Z. Grom: Del clsd by 12 hurrd bro quuuaurst conne tunnorrwb.
CODDOW & C.

"That's it," continued his friend, "this is intended for Graham the lawyer. It means for him to go ahead and buy some land for $1,200, and that the man who wants it will be here to-morrow. That's easy to read compared with most of them. Let's go over and give it to Graham and then hunt up your message—it has probably been delivered around town somewhere."—Dakota Bell.

A Straight Bribe.

"Boy, are you acquainted around here?" he asked of a lad on Michigan avenue.

"Yes, sir."

"I want to find the Civilized Cornice works."

"Never heard of 'em."

"But it's an old concern, and I was told to come to this corner. There's a big sign on the roof."

"Oh, you mean Galvanized Cornice works. It's right around that corner."

"Bub, did I say civilized?"

"Yes, sir."

"And the proper word is galvanized?"

"That's it."

"Here—come here. Here's a dime for you, and you just keep mum about what has passed. I'm going to run for supervisor this fall on the strength of being a self-made man, who got his education by the light of a corn-cob candle, and I don't want the infernal opposition to get hold of the fact that the candle went out on me too soon."—Detroit Free Press.

An Unreliable Vessel.

Mrs. DeBiggs—John is overrun with business cares just now. By the way, is Mr. DeKaggs in business?

Mrs. DeKaggs—Why, yes, deeply. He told me that yesterday he bought 1,000 bales of cotton, 1,000 barrels of oil and I don't know how many bushels of wheat.

"He must be doing a large business. Where is his store?"

"He has no store. He says he has the goods on a 'margin'—some sort of vessel, I presume."

"Dear me, I'm so glad."—Philadelphia Call.

FROM ALASKA.

Arrival of the Idaho—Yukon Gold Mines.

The steamship Idaho arrived from Alaska on Saturday evening and left shortly after for sound ports. The most important news is in reference to the Yukon mines, which have yielded on the whole fair returns. Forty Mile Creek was the chief mining camp this summer and most of the miners secured some gold, and several will be able to clean up several thousand dollars. A great many miners came out for the winter and all expect to return in the spring. A number are wintering on the river.
